OF ENVIRONMENTAL HEALTH, HSPH

APPLICATION DEADLINE:
12 NOON,
OCTOBER 18, 2024

[REGISTER HERE](#)

OBJECTIVE

The course aims to provide a comprehensive understanding of climate change impacts on health and the environment, emphasizing key mechanisms and effective study design. Additionally, it focuses on applying an equity lens to assess vulnerabilities and exploring health system responses to climate challenges.

COURSE OUTLINE

1. Introduction to Climate Change and Environmental Health
2. Climate, Food Systems, and Nutrition
3. Climate and Infectious Diseases
4. Extreme Weather and Health
5. Climate Change and Health Systems

ELIGIBILITY

Researchers/ students with Postgraduate degree in Public Health and/or environmental health or related discipline and demonstrated interest in environmental health/ climate change and/or environmental policy.

HOW TO APPLY ?

Fees: There is no registration fee for the course. Participants are required to arrange their own travel and accommodation.

Process: Register yourself with the link provided here or scan the QR code. Please provide all the information required for registration. Selected candidates will be contacted after the application deadline is over.
